**Prior authorization (PA) is required for all non-preferred short acting opioids. PA is also required for members when the total daily opioid dose (combined across all opioids) exceeds the set morphine milligram equivalent (MME) threshold (include High Dose Opioids PA form with request). Payment will be considered under the following conditions: 1) Patient has pain severe enough to require opioid treatment; and 2) Patient has tried and failed at least two nonpharmacologic therapies; and 3) Patient has tried and failed at least two nonopioid pharmacologic therapies; and 4) Patient has documentation of previous trials and therapy failures with three (3) chemically distinct preferred short acting opioids (based on opioid ingredient only) at therapeutic doses; and 5) The prescriber has reviewed the patient's use of controlled substances on the Iowa Prescription Monitoring Program (PMP) website and has determined that use of a short-acting opioid is appropriate for this member based on review of PMP and the patient's risk for opioid addiction, abuse and misuse prior to requesting prior authorization; and 6) Patient has been informed of the common adverse effects and serious adverse effects of opioids; and 7) For patients taking concurrent benzodiazepines, the prescriber must document the following: a. The risks of using opioids and benzodiazepines concurrently has been discussed with the patient; and b. Documentation as to why concurrent use is medically necessary is provided; and c. A plan to taper the benzodiazepine is provided, if appropriate. If criteria for coverage are met, an initial authorization will be given for 3 months. Additional approvals will be considered if the following criteria are met: 1) Patient has experienced improvement in pain control and level of functioning; and 2) Prescriber has reviewed the patient's use of controlled substances on the Iowa PMP website and has determined continued use of a short-acting opioid is appropriate for this member. 3) For patients taking concurrent benzodiazepines, the prescriber must document the following: a. the risks of using opioids and benzodiazepines concurrently has been discussed with the patient, and b. Documentation as to why concurrent use is medically necessary is provided; and c. A plan to taper the benzodiazepine is provided, if appropriate. The required trials may be overridden when documented evidence is provided that use of these agents and/or non-pharmacologic therapies would be medically contraindicated.**

**Preferred (\*Please refer to the PDL for a complete list of preferred alternatives)**

 Acetaminophen/Codeine  
 Hydrocodone/APAP  
 Hydromorphone Tab  
 Morphine Sulfate Tab  
 Oxycodone Cap/Tab  
 Oxycodone /APAP (5/325)  
 Tramadol 50mg

**Non-Preferred**

 Butalbital/APAP/Caff/Codeine  
 Butalbital/ASA/Caff/Codeine  
 Hydrocodone/APAP (5/300, 7.5/300, 10/300)  
 Hydrocodone/Ibuprofen  
 Meperidine

 Oxymorphone  
 Oxycodone/APAP (7.5/325, 10/325)  
 Roxicodone  
 RoxyBond  
 Tramadol (25mg, 75mg, 100mg)

Other (specify): \_\_\_\_\_

Date of submission

**IMPORTANT NOTE:** In evaluating requests for prior authorization, the consultant will consider the treatment from the standpoint of medical necessity only. If approval of this request is granted, this does not indicate that the member continues to be eligible for Medicaid. It is the responsibility of the provider who initiates the request for prior authorization to establish by inspection of the member's Medicaid eligibility card and, if necessary, by contact with the county Department of Health and Human Services, that the member continues to be eligible for Medicaid.
