Description

Treatment Room and Specialty Services revenue codes characterize services performed in a facility setting that are represented by a specific procedure reportable in a treatment room setting. The patient receiving these services must be registered through the hospital business office for outpatient services on a hospital campus.

Treatment room services are outpatient services, furnished on hospital premises, which require the use of a bed, and periodic monitoring for a relatively brief episode of time in order to carry out certain procedures. The use of the treatment room is an expected part of a minor procedure and replaces the charge for the operating room and recovery room as patients can also recover in the treatment room. Operating rooms are procedure rooms within a sterile corridor and are used for open or major surgical procedures usually involving general anesthesia.

Policy/Criteria

The health Plan does not reimburse for facility evaluation and management (E/M) charges billed in conjunction with a treatment room revenue code as these services do not represent a *specific procedure* performed in a treatment room. Billing treatment room revenue codes is incorrect coding when reported for office-based evaluation and management services.

The health plan will reimburse facility treatment room services directly related to the procedure(s) that are provided on the same day in which the treatment is rendered.

Applies to:

Type of Bill 130x

Reimbursement Guidelines

The health plan's code editing software will evaluate claims billed with revenue codes 760, 761 and 769 that are billed in conjunction with an evaluation and management service according to the application criteria mentioned in this policy.

Any service line reported incorrectly will be denied for reimbursement.
